

Installing and running foodel on Windows.

1. Download the foodel.zip file from the website
2. Foodel.zip will now be in your downloads folder
3. Drag foodel.zip to a more convenient location such as the desktop
4. Right-click the .zip and select Extract All
5. You should now have a Foodel folder alongside the zip

6. Create a folder to store your data in as well (you can call it something like myFoodel) and use that to store your delivery files (you can download a sample input file from www.foodel.info)
7. You can now run foodel following the steps on the overview video.
